

FIRST AID POISONED DOG OR CAT

3 types of poison used in Dahab, sometimes in combination:

- Strychnine
- Rat poison (Warfarin)
- Organophosphate

Only make the dog vomit if you see the dog actually eating something poisoned.
If you don't see it or if the dog has convulsions don't try to make it vomit because it can get into its lungs and cause pneumonia.

How to make a dog vomit:

give it salt water

or: put a little salt on its tongue, not too much, this can be dangerous for the dog

or: mustard

STRYCHNINE

<p>Symptoms (after 10 – 20 min.)</p> <ul style="list-style-type: none">- convulsions- big eye pupils	<p>Treatment for dog 20 kg</p> <p>Valium / Diazepam Use rectal: 1 ampoule in syringe without needle, ½ ampoule after 10 min, ½ ampoule after 10 min.</p> <p>NO atropine, this speeds up the heart rate.</p> <p>Dissolve activated charcoal (pills or powder) in 10 or 20 ml water and squeeze it into in the mouth with a big syringe. Don't do this when the dog is convulsing.</p>
---	--

Important: get the dog in a cool, dark place without noise, switch off doorbell and telephone, sudden sounds trigger convulsions, don't speak loud

RAT POISON / WARFARIN

<p>Symptoms</p> <ul style="list-style-type: none"> - bleeding from mouth and nose - blood spotting in whites of eyes and/or inside lips 	<p>Treatment for dog 20 kg</p> <p>Vitamin K 5 ampules in different places under skin. You can use the same syringe.</p> <p>After that: 2 ampules every 12 hrs for 5 days.</p>
---	---

When a dog survived Warfarin poisoning keep it calm for a couple of days, don't let it run because it can cause bleeding in the joints.

ORGANOPHOSPHATE

<p>Symptoms:</p> <p>difficult breathing a lot of saliva small eye pupils</p>	<p>Treatment:</p> <p>1 ampule atropine under the skin or in the muscle</p> <p>Dissolve activated charcoal (pills or powder) in 10 or 20 ml water and squeeze it into in the mouth with a big syringe.</p>
--	---

First Aid Cats:

symptoms are the same
take ¼ of described doses

Get the dog / cat as fast as possible to a vet for further treatment.
